3rd Grade Math

Students in Mrs. Plant's 3rd grade class were studying probability. They read a book, watched a Brainpop video, used M&Ms to relate to probability vocabulary and performed experiments to record data. It is "likely" the students had a great time!

By: Mrs. Mary Plant

Lego Robotics

4th grade gifted students have spent several class periods building this EV3 Lego robot. Once assembled, the students got to program the robot with a name. They chose Rodozer. Using an iPad, the students programmed the robot to navigate through teacher made roads. We all really enjoyed working through this task!

Chalk Day

Kindergarten students are celebrating the end of the year by counting down with our ABCs. Today was "C" day. We celebrated by having Chalk Day. The students worked together to draw beautiful masterpieces while enjoying the sunshine.

Feeling Lucky?

SOLs are underway at GES and our third and fourth grade students are not taking any chances on their luck. Students stopped to take the time to rub some lucky items before going into start their test. They loved rubbing a rabbit's foot, lucky troll hair, or some Lucky Charms.

Calendar

Monday, May 22nd – 7:30 pm City Council Meeting
